

Solving airport schedules

Emil Ulvagården

Objectives

Air traffic control - aircraft arrivals, taxiing, gates and departures

Schedule optimization - allocation of gates and taxiways in the time constraints

Challenge:

- Accommodate all aircraft within their arrival/departure intervals
- No gate / taxiway over capacity

Models

Flight information

Airport infrastructure

Schedule

Third-party input

Third-party output

Domain and tool integration

Four domains:

Flight, Airport, Schedule, Third-party schedule solver

External tools:
